

Bank Sohar shows its concern towards society by supporting Association of Early Intervention for Children with Disabilities

Bank Sohar as part of its corporate social responsibility initiative donated 10,000 Omani Rials to the Association of Early Intervention for Children with Disabilities, to expand its current headquarters that would be able to accommodate more number of children from various regions of the Sultanate and provide them with necessary equipments.

In line with Bank Sohar's belief of the noble mission and services provided by the Association, Ms. Munira Abdul Nabi Macki, DGM Human Resources & Corporate Support and Mr. Mazin Mahmood Al Raisi, AGM Marketing & Publicity - Bank Sohar visited the Association to orient themselves with its activities, and to meet with its supervisors and professionals. Bank Sohar officials also met with the Association's officials to whom they presented the cheque for 10,000 Omani Rials as a donation.

Commenting on the visit, Ms. Munira Macki, said, "Through this gesture, Bank Sohar renews its commitment to support charitable societies, in line with its sense of responsibility towards these societies, and primarily towards the children who need care, affection, and attention of all people to help them overcome their disabilities "

On his part, Mr. Mazin Mahmood Al Raisi, said, "These human gestures are not unusual for Bank Sohar. Support to social work is part of the Bank's commitment that it has not deviated from it, since its inception. This is why we as employees of Bank Sohar are extremely proud to work with this institution, which does not hesitate to take care of every act of charity, especially when it comes to children."

The Center's officials welcomed Bank Sohar's initiative, Dr. Masoma Al Saleh, Director General of the Center said "On this occasion, I am pleased to extend my sincere appreciation to Bank Sohar family for the visit and the donation that will certainly contribute in facilitating and expanding the center's activities to provide quality services to many more children ."

The Association of Early Intervention for children with Disabilities was established to offer services to children born with disability from birth to 6 years. These services cover social, educational and therapeutic needs that would help them address or mitigate their disability and prepare them to enroll into regular primary schools. The Association also works to spread awareness in the society on the importance of early intervention for children who exhibit symptoms of disability.
